

# EARN YOUR CERTIFICATE IN COMMUNITY-BASED ENVIRONMENTAL MONITORING

**Our Environment is Integral to our Community and the Legacy we leave behind.**

Earn the qualifications and credentials you need to begin your career in the Environmental sciences; with theory and practical training using Indigenous Science and Knowledge with Western Science. Upon completion of this 10-month program, graduates may find employment with Nations/Communities, Indigenous owned and operated environmental companies, environmental consultants, industry employers, become an environmental entrepreneur or further their education in the environmental sector.
